HOW-TO:

MINIATURE GARDEN

You will Need:

A small plant pot

Soil to fill the pot

Small succulent plants or plant clippings

Pebbles

Twigs

Instructions:

1. First you need to fill the plant pot with soil, that's what plants love to grow in!
2. Next, put your little plant clippings or small plants into little holes one by one - pat the soil back around them so

they're all snuggly.

3. If you want you can use little pebbles to make a path or twigs to make a fence!
4. When you're ready take a little water and gently drop it over each plant. The best part is you can keep adding to your garden whenever you want. That's how you make a little Didi and B garden!
