HOW-TO:

PINE CONE BIRD FEEDER

You will Need:

Peanut butter (or sunflower or soynut butter)

Birdseed

A pinecone

Some twine or string

A plastic butter knife

A plate

Instructions:

1. Tie the string around your pinecone so you have a lovely loop to hang it from.

2. Take the butter knife and scoop out loads of your peanut or sesame butter and smosh it all over the pine cone - make sure you get it into all the little gaps.

3. When the pinecone is coated, put all of your birdseed on the plate and roll the pine cone in the birdseed - press it down so it's covered really well. Press the birdseed on with your hands too!

4. Hang your pinecone bird feeder in a tree or somewhere where birds can find it!
