HOW-TO:

RAIN PAINTING

You will Need:

A watercolour paint set

A plastic bag

Paper

A rolling pin or a big shoe or rock

Water spray bottle (if it's not raining)

Instructions:

1. Take your watercolours and choose which colours you want.
Put each different colour into a plastic bag.
2. Break your paint up into tiny pieces. Take your rolling pin and roll it over the bag. If you want, use the rolling pin to tap them, and break them up even more, or even get a

small rock to help! Keep going until the paint is all broken up into tiny crumbs.

3. If it's raining put your paper outside to get a little bit wet. But if it's sunny then just get your spray bottle and give it a good spray.
4. Take your different watercolour crumbs and sprinkle them all over the wet paper! Make sure you spread them out so there are crumbs everywhere! Watch what happens as the water and the paint start to spread! If you need a bit more water at the end, either put your painting outside in the rain again or give it another spray!
